Abstract

The object of this paper is deciphering of Cretan Linear A inscriptions spread mainly across the Aegean area.

1. The paper presents a brief background of the ancient population of the Peloponnese, Asia Minor and the Aegean islands before the Indo-European migrations. It is supposed that the indigenous inhabitants of this area were of non-Indo-European and non-Semitic origin.

2. The study of the linguistic material and graphical qualities of Linear A, and the phonetic reading of Linear B script by M. Ventris, granted the correctness of my decipherment of Linear A inscriptions in the Common Kartvelian.

Some of the deciphered Linear A words are the following:

a. Words for numeral operations: (addition) ku-ro – “to bind, gather, collect, add”, and (subtraction) ki-ro – “fault, defect; to subtract, lessen, diminish, cut off”;
b. Names of vessels for liquid – qa-pa3, ka-ti, and ka-di;

Keywords: Linear A script, the Common Kartvelian language, comparative and inner reconstructions.
