## **ABSTRACT**

Teacher Education is a discipline that teaches the next generation what has happened, where we are, where we want to go, and what we want to create, looking for a healthy, long-term life.

It is one of the most important places where many new ideas can be tried and implemented.

The available paper discusses the need for this.

A teacher training program will be established, as well as the status of a new teacher education program at various universities and national institutions.

This paper also discusses the basics of these teacher training programs and methods and finally suggests some new features of teacher education programs.

**KEYWORDS:** Conceptual thinking, Innovative ideas, Life skills, social management, Technology integrated
