### ABSTRACT

The learning results in the Higher Education System of the Republic of Colombia have become a challenge for the design of Academic Programs, the creation of conducive Learning environments and the rigorous Evaluation of Quality. Debate that takes place in the international environment of some European and Latin American Education Systems. The central purpose of this presentation is to demonstrate the contemporary debates in our Higher Education Educational System, on training under the Competencies approach and evaluation of Learning Results. Finally, we will open a space for dialogue that raises questions and comments that impact the progress of our ongoing research under this topic.
