Abstract

For decades, innovation of creating new compositions, devices, processes, and techniques were the practical outcomes of strategic education research and training. As such industrial and digital revolutions came into existence for the betterment and advancement of all sectors of global communities. Until now, several innovative strategies applied in various global sectors and institutions have been reported in the literature review. This study focuses on the development and application of a new strategic innovative curriculum for education and training. Thus, focusing on the planning, design, and suitable routes to the practical application of sustainable innovative goals within the strategic innovative curriculum for the present and future education and training in all institutions of learning are discussed in this research paper.

Keywords: curriculum; innovation; invention; learning; sustainability.
