Abstract

Saryarka is the vastness of the Kazakhstan steppes, which contains unique natural - cultural monuments and mysterious phenomena. This region was inhabited by people in ancient times. Evidence of this is the sustainable process of cultural engagement for many millennia. According to scientific data, the region faced the stone, bronze, iron ages and the development of other valuable metals, also it was the capital of medieval uluses and empires. During the genesis of the Kazakh nation and in subsequent years did not lose its strategic importance.

Keywords: monument, culture, central Kazakhstan
