Abstract

Innovation policy and finance are integral components driving economic growth, technological advancement, and societal progress. This paper explores the intricate relationship between innovation policy and finance, shedding light on the synergies, challenges, and strategies for fostering sustainable innovation ecosystems. Through an analysis of key concepts, case studies, and policy frameworks, this paper aims to provide insights for policymakers, investors, and entrepreneurs seeking to navigate the dynamic landscape of innovation-driven economies.

Keywords: Innovation, Policy, Finance, Sustainability, Ecosystems, Investment.
